

What are the most common communication issues for remote teams using Agile/Scrum in game development? How can these issues be avoided?

COMP150 - Agile Essay Proposal

1507516

March 1, 2016

Agile methods requires constant effective communication in order to work well, as there are a wide range of communication options such as; video conferencing, telephone and remote desktop. This paper will address which method of communication will be most appropriate for game developers and the problems that occur with using such methods.
